HUBBARD GLACIER is the largest tidewater glacier on the North American continent. It is located in the U.S. state of Alaska and also in Canada's Yukon Territory. Standing at 11,000 feet above sea level, the glacier stretches 76 miles (122km) from its source in the Yukon to the sea at Yakutat Bay and Disenchantment Bay. It has an open calving face of over 6 miles (10kms) wide, and has been advancing toward the Gulf of Alaska since it was first mapped by the International Boundary Commission in 1895.

INFORMATION

HUBBARD GLACIER VIEWING

Grab your binoculars, dress warmly and join us outside as we explore one of the most dramatic pieces of glacier scenery in all of coastal Alaska. The time spent in front of the glacier will vary due to weather, current, tide, visibility and ice conditions.

From **10:00am until 11:15am** (approximate times, weather permitting), we will allow controlled access to the bow on Deck 5 forward (accessible through the Celebrity Theater port side). This area is not accessible for guests with walking difficulties or in wheelchairs. Guests must be physically able to climb staircases to access the bow. Please only wear non-slip closed-toe shoes.

HUBBARD GLACIER COMMENTARY WITH MILOS

9:30am (Approximately) | Public Areas & TV Channel 31
